

# THE HAND BAKED ARCADE

[HANDBAKEDARCADE.CO.UK](http://HANDBAKEDARCADE.CO.UK)

The Hand Baked Arcade is a temporary social space that would be the ideal addition to your event. We build the ultimate retro gaming area, from portable, 12v powered setups to multiple projected screens and arcade machines!

The Installations have been seen at many festivals and nightclubs including Glade and Glastonbury Festivals, Bloc Weekend, Boomtown and many more.

Nostalgic gaming is simply irresistible to many, bringing together strangers and helping to provide a unique, family-friendly atmosphere at your event.

The geodesic dome above can be supplied and works as an excellent back projected screen. The dome is pre-programmed to change colour as well as having moving, multi-coloured laser patterns drawn on its cover. Any of the Hand Baked Arcades consoles can be connected up to this dome and all games are free to play.

Multiple domes can be supplied, from 3 to 10 metre diameter with or without a Hand Baked Arcade installation. These strong structures are perfect as alternatives to the usual boring marquees seen at many events.

The photo above/right is of the 12v portable arcade system. This unit enables a walk-about set up ideal for any festival or outside gathering where projecting large screen images is no longer restricted by location.

Alternatively The Hand Baked Arcade can invade any space you supply and set up a large-scale retro gaming space. So if you have a bar that needs extra entertainment, a venue that needs some visuals or a whole marquee to transform then please do get in touch.
